Commander R. L. Pylant  
Public Works Division  
Naval Weapons Station Earle  
Colts Neck, New Jersey 07722

Dear Commander Pylant:

In early October I contacted you to arrange a date for the resampling of one of the base's streams tested last May by this Division. As I am concerned with the cold weather approaching and also expediting the resampling, I would appreciate your contacting myself, or Mr. Frank Groman, who will be assuming my position, immediately to set up a date. As I had indicated in my October letter, it will be the responsibility of your staff to arrange a lab for split-sample analysis.

The NJDEP is also in receipt of the POAM by Weston and has forwarded its comments to EPA as well as your office. As such, I am requesting that a site visit be arranged for members of this department to NWS Earle to allow an on-site inspection of sampling points. The maps presented in the Weston workplan made the development of a thorough sampling strategy extremely difficult, and a site visit is in order. I would appreciate it if you would contact Mr. Groman as soon as possible to arrange this visit.

Both Mr. Groman and myself can be reached at 609-984-3074 if you need assistance.

Thank you for your cooperation.

Sincerely,

Beth I. Muhler, Site Manager  
Bureau of Site Management
